

Author Guidelines for Feature Articles of IEEE Signal Processing Magazine

Jane Doe, *Senior Member, IEEE*

This is a template for SPM Feature Articles, and please note that these do not have an abstract and the sections are not numbered.

SCOPE OF SI ARTICLES

Feature articles of the IEEE Signal Processing Magazine (SPM) [1] are designed as tutorial-like papers aimed at a broad audience, in signal and image processing and beyond.

ARTICLE SPECIFICATIONS

Feature Articles are up to 40 pages with a total number of references up to 60 and a total number of figures/tables up to 15. All limits above (at submission time) are for double-spaced and single column format using a minimum font size of 11pt, according to this SPM Paper Template. They also include all figures, tables and references. Please note that subfigures as in (a), (b), ... count as separate figures.

CONCLUSION

This document provides prospective authors with essential guidelines for preparing and submitting feature articles to the IEEE Signal Processing Magazine. Authors are encouraged to follow the detailed instructions for manuscript preparation, formatting, and submission to streamline the review process and enhance the overall quality of their publications. By adhering to these guidelines, authors can effectively communicate their research and insights, thereby fostering a vibrant exchange of knowledge and perspectives with the signal processing community.

Template prepared by T. Adalı and A. Yeredor, June 2024.

ACKNOWLEDGMENT

If desired, this is a simple paragraph before the references to thank those individuals and institutions who have supported your work on this article.

BIOGRAPHIES

For Feature Articles you are asked to include a 100-word biography. Here is the required information: //Author Name// //(email address)// received his/her //highest degree// in //area// from //institution//. [Do not need to list the year but can use it if it is provided. OK to list location if provided but not required.] He/she is a //role// at //institution, city/state/postal code/country//. //Last name// serves as a //role// on //related publication or Society//. [List 2-3 major awards.] //His/her// research interests include //3-5//. //Last name// is a //IEEE membership level// (if applicable).

Sample Bio

First Author Name (*Member, IEEE*) received his B.S. degree from the Insert College Name and his M.S. and Ph.D. degrees from University Name. He was a postdoctoral researcher at the Company Name and is now a job position at University/Company Name, University/Company City, State, Postal Code, Country. He is a recipient of the Insert Your Award Name Prize. His research focuses on the design, analysis, and implementation of algorithms for large-scale nonlinear optimization problems. He is a Member of IEEE.

Second Author Name (*Fellow, IEEE*) received his B.S. degree from the Insert College Name and his M.S. and Ph.D. degrees from University Name. He was a postdoctoral researcher at the Company Name and is now a job position at University/Company Name, University/Company City, State, Postal Code, Country. He is a recipient of the Insert Your Award Name Prize. His research focuses on the design, analysis, and implementation of algorithms for large-scale nonlinear optimization problems. He is a Member of IEEE.
